- ISBN:** 1-876990-38-4 **Barcode:** 9 332869 000398
- Pricing:** Home edition \$49.95 – single licence (4 users)
(code MW-S4-002-1H)
Library edition \$59.95 – public lending licence (4 users)
(code MW-S4-002-1L)
School edition \$79.95 – single licence (unlimited users)
(code MW-S4-002-1S)
- Site Licences:** (includes Media)
\$199.00 – unlimited sites (code MW-S4-002-LU)

- Features:** • fully narrated • 4 difficulty levels • 6 subjects • engaging graphics • achievement tracking
• genuine skill-building activities • instant feedback • positive reinforcement • printable results & certificates

Overview: Schooligans is a series of four learning programs jam-packed with comprehensive phonics, spelling, reading, grammar, maths and thinking exercises. Each program provides students with a structured learning environment that is fun to use and educationally sound.

In Schooligans 4, students will learn:

Phonemic awareness; covering diphthongs, vowels with 'r', digraphs, compound words, dividing words into syllables (VCV & VCCV words), dividing -le ending words, dividing complex words (prefix-base word-suffix).
Promotes independent reading skills using blending skills for words that aren't recognised immediately, extensive word recognition activities, skills for dealing with long and complex words and vocabulary development.

Spelling skills; covering 32 age specific word lists, sorted phonetically, with 5 different spelling games.
Reinforces spelling and vocabulary skills using sound, text and visual cues, including sentences for context.

Reading fluency; covering 32 graded passages with topics that will appeal to any reader.
Encourages improved reading ability by tracking the student's reading speed, comprehension of what has been read, and selection of unfamiliar words.

Grammar rules and correct use; covering Abbreviations, Adverbs, Clauses, Comparisons, Conjunctions, Gender, Homonyms, Nouns, Numbers, Phrases, Pronouns, Punctuation, Similes, Synonyms, Tense, Verbs and more.

Mathematics; covering basic addition, subtraction, multiplication, and division, using randomly generated questions and increasing levels of difficulty, supported by interactive tutorials at each level.

Thinking skills; covering brainteasers, logic problems, word problems, sequencing, and general knowledge.

Compatibility: Vista XP 2003 2000 Me 98 - OS X.x
